## *Implemented*

### **AI Generated Conversational Videos**

Generate AI videos of a talking human using an online AI video generation tool.

### **Automated Video Editing with AI**

Automate the process of editing the explanation-video with the use of AI, by modifying the scene using the context of the script. (also the branding can be customised)

### **Wide Range of Available Speakers**

Don't like Laura? try a different speaker!

## *Future work*

### **Personalised AI Generated Video Script**

Generate explanation-video scripts dynamically with the use of AI and client data.

### **Enhance the Automated AI Video Editing**

Dynamically add smaller-videos to scenes which fit the context of the script.

### **Ease the Proces of Use**

Allow chosen developers to simply send client data to the tool and receive a fully edited AI explanation-video.
